VISION

"To make every man a success and no man a failure"

MISSION

To provide aspiring students modern training aircraft and allied facilities and industry specific courses to obtain their Commercial Pilot's License and guide them in fulfilling the industry standards to achieve their Airline Transport License.

Why Work When You Can Fly ?

Indian Aviation sector has grown tremendously in the last decade with the opening up of Indian Skies for the Private Sector and advent of low cost airlines. India is now the 9th largest aviation market in the world. It has been estimated that India would become the 3rd largest aviation market globally by 2020.The domestic airlines are expected to double their combined fleet size to 800 in the next 5-6 years. Strong passenger growth in the past three years has resulted in domestic air traffic crossing the 116 million in 2017. Domestic Traffic grew over 20% in 2015 & 2016.Affordability will continue to drive demand and we will see an unprecedented number of Indians taking to the skies each day. With the Government allowing six more start up carriers to fly, three each getting national and regional permits, the aviation sectors is set to see another exciting phase.

The worldwide commercial aviation industry will need an extra 255,000 pilots by 2027 to sustain its rapid growth and is not moving fast enough to fill the positions. More than half of the required pilots have not yet begun training ,storing up potential problems as the industry braces for an increase in passenger air traffic that is expected to double the size of the commercial air transport industry in the next 20 years. Rapid fleet expansion and high pilot retirement rates will create a further need to develop 180,000 first officers into new airlines captains, more than in any previous decade.

Orient Flights – Legacy of 24 years

Orient Flights has a legacy of 24years and 35000 flying hours with more than 300 pilots trained under highly qualified Flight Instructors. Orient Flights has an enviable infrastructure, experienced faculty, an expanding fleet of new aircraft and a large hangar at Mysore Airport. All these ensure that the academy delivers quality training on par with global standards.Presently,Orient Flights offers fully integrated DGCA approved courses which are equipped with best in class training on modern Aircraft and Simulators.
